

**ECOLIZER**

Restoring the Rhythm

Since 2020

# Ecolizer

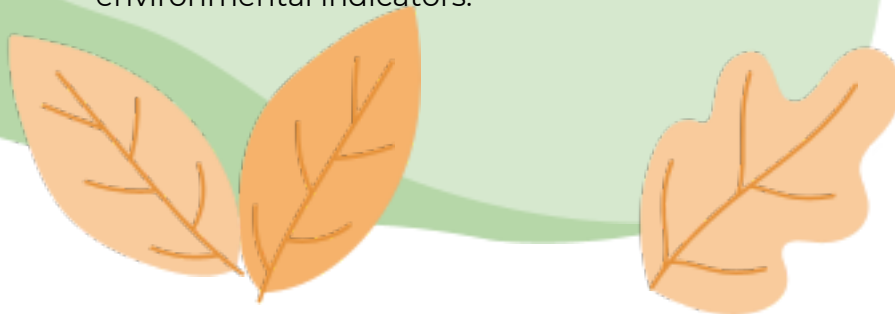

Restoring the Rhythm

# Who We Are

**Mission**-To revive and restore the harmony of our environment through practical and sustainable solutions for environmental issues.

**Vision**- We aim to provide cost effective and eco-friendly solutions to our customers for leading a better life by simultaneously boosting the local economy along with improving environmental indicators.

## Our Primary Focus Area

Municipal Solid Waste  
Management

Informal sector  
integration

Since our inception, Ecolizer in collaboration with Green Worms has been actively working with **22+** Urban Local Bodies (ULB) in Odisha to ensure end to end management of municipal solid waste.

We customize our services according to the needs of the ULBs.

Starting from collection and handling to disposal we are equipped and have performed the recovery of **7000+ tons** of plastic and **5000+ tons** of other waste materials diverting from landfill.

We primarily focus on customizing our interventions by developing **ward- wise collection plans**, introducing **tech solutions** to regular waste management, conducting beach cleanups, etc.

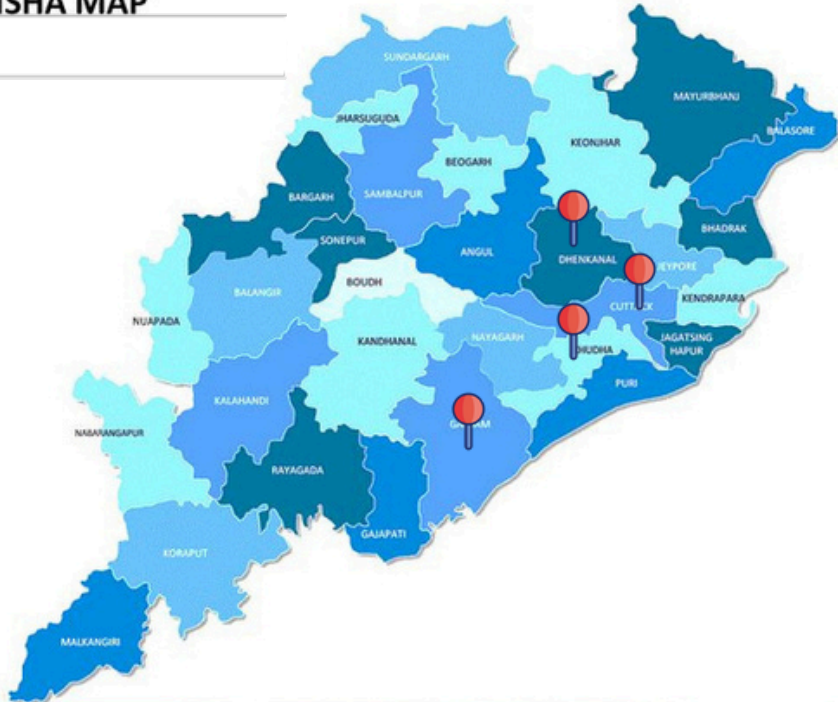

This has led to the recovering of waste from those parts of the city which would have otherwise remained untouched.

Engaging the youth, **facilitating Community-Based Organizations** for campaigns.

# Introduction

Ecolizer is currently working in **22 ULBs** of Odisha so far

## ODISHA MAP

### Centralized

**Berhampur**

### Decentralized

**Bhubaneswar**

**Cuttack**

**Ganjam District**

# Our Ongoing Projects

Although our focus is solid waste management, we are trying to expand our horizons. Ecolizer is currently working on the following projects.

## Operations & Management of Wealth Centres

Ensuring better mobilization of workforce, increasing efficiency and revenue generation of government bodies dealing with waste management. We are currently piloting at the Binod Bihari Wealth Centre in Chatrapur NAC.

## trashback

50+ Scrapdealer onboarded in pur platform and aims to help them build their business with realtime simplified data driven decision making and credit leverage for loyal ones.

## Capacity Building Training

Imparting regular workshops and visual training to the sanitation workers so that maximum value extraction is ensured. Enabling the sanitation workers in their capacity building and leadership qualities to initiate self-sustenance amongst the workers.

# Other Projects

Although our focus is solid waste management, we are trying to expand our horizons. Ecolizer is currently working on the following projects.

## Beach Clean-up Drives

We have collaborated with Decathlon, Camps & Kayaks and other organizations on beach cleanup drives targeted at oceanbound plastics.

## BSF Treatment for Bio Waste

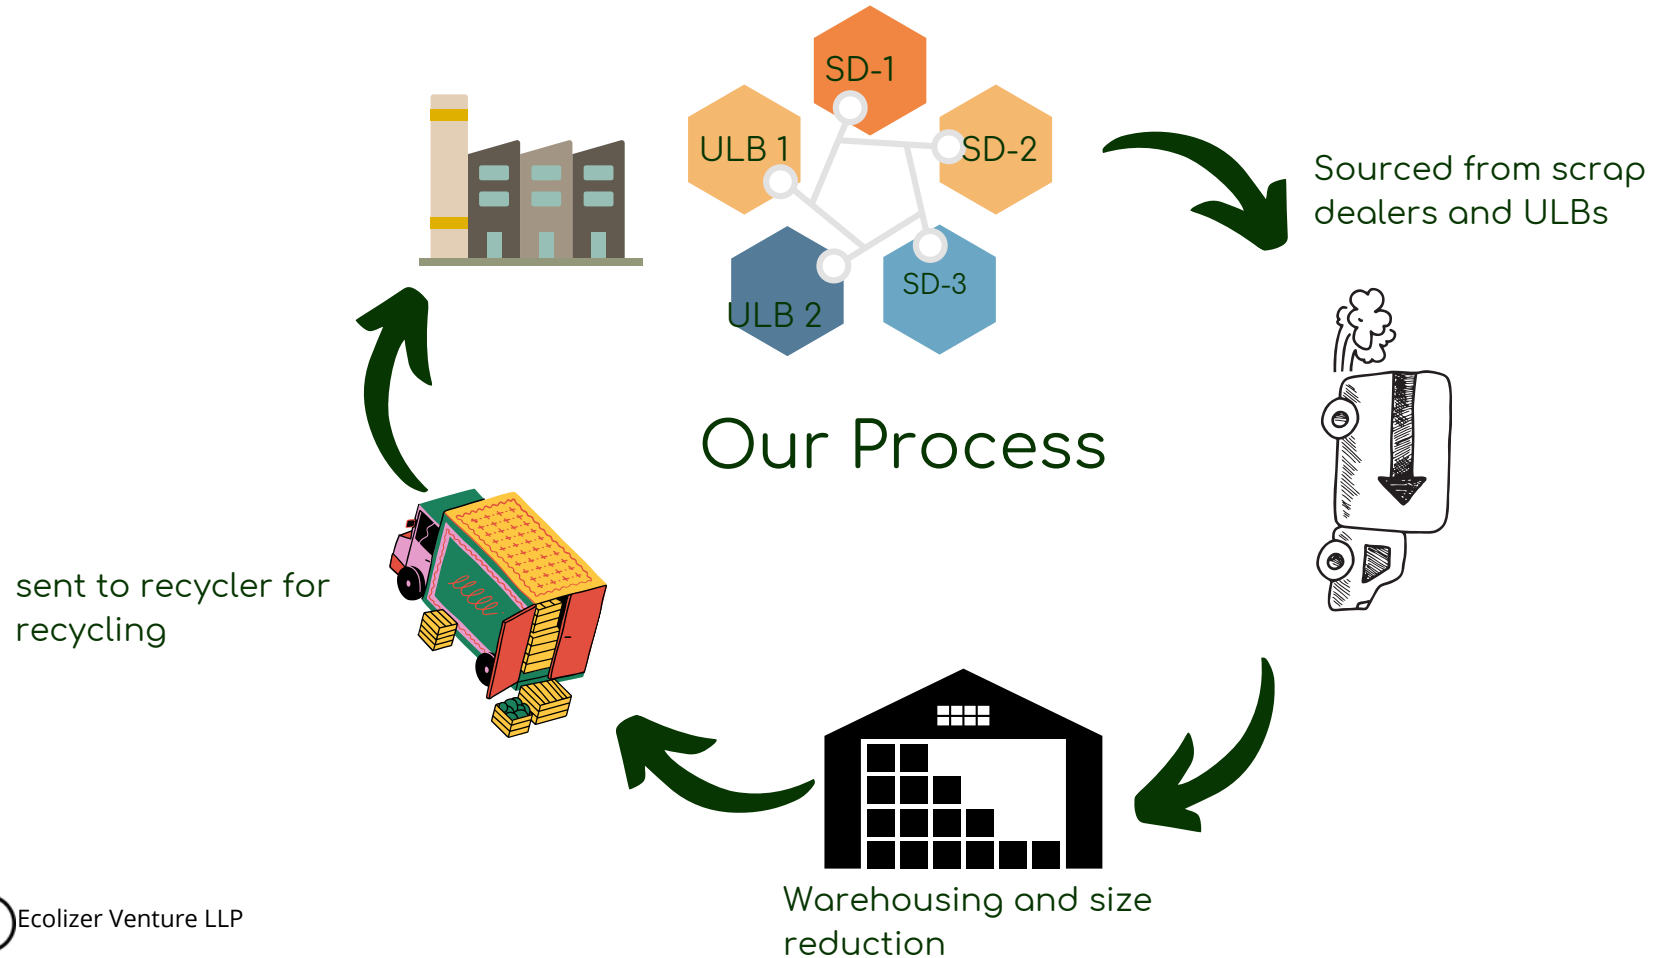

Treatment of bio waste through Black Soldier Flies (BSF) is an alternative method which we have the training to design and execute. It increases both the amount of waste that can be treated and the revenue generated from the same.

## IEC Activities

Information Education Communication (IEC) activities can play a major role in building cohesion and understanding in a group or community of people. We can design and hold sessions of such activities for anyone from the workers to the citizens.

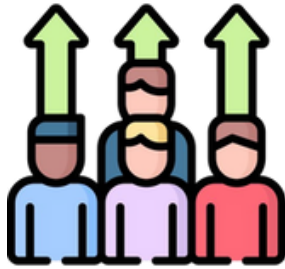

Ecolizer is currently working in **50+ scrapdealers** in the coastal district of Odisha

# Our Services

To achieve our goals of sustainability we are collaborating with government stakeholders like Urban Local Bodies (ULB) to improve waste management implementation on a local level by providing quality services such as-

Workforce Management - enabling the SHG women to move into managerial roles and entrepreneurship

IoT based door to door collection and Handling of Waste

Maximum Value Extraction- 90% of material recovery from dry waste

# Supporting SDGs

Ecolizer is achieving the following Sustainable Development Goals as put forth by the UN.

No Poverty

Creating jobs and other opportunities for work in local communities. Through new projects and solutions we do our part in eradicating poverty.

Sustainable Cities  
and Communities

Providing consultation on effective waste management and ethical procurement of waste for effective recycling and co-processing.

Climate Action

Integrating climate change measures into our strategies and planning for regular waste disposal.

Life Below Water

Undertaking beach and river clean-up drives focused on recovering plastics in and around aquatic ecosystems.
